Many security breaches go undetected, silent, stealthy, and capable of causing long-term damage before any alert is triggered.

DigitalEra's Compromise Assessment Service goes deeper than routine monitoring, providing expert-led investigation into your environment to detect signs of past or ongoing compromise.

Uncover Hidden Threats. Validate Your Security Posture. Act with Confidence.

Collaborative Scoping & Threat Modeling:
Define engagement objectives through scoping workshops, threat landscape analysis, and attacker TTP alignment based on your specific environment.

Secure Data Collection & Telemetry Analysis:
Collect system logs, endpoint artifacts, and security telemetry across servers, endpoints, and cloud workloads using secure transfer processes.

Expert Threat Hunting & Validation:
Conduct deep manual analysis to identify Indicators of Compromise (IoCs), adversary behaviors, and correlated activity, validated against known attacker methodologies.

Reporting, Remediation & Leadership Briefings:
Deliver executive-level summaries, detailed technical reports, and prioritized remediation guidance, with optional presentations for technical teams and leadership.

WHY CHOOSE US?

Breach Investigation Experience:
Our team has led real-world incident response and compromise investigations across industries.

Executive-Focused Communication:
We present clear, actionable findings for both technical teams and business leaders.

Context-Rich Validation:
Findings are fully validated and prioritized, no auto-generated reports or unchecked alerts.

Integrated Expertise:
Seamless connection to our Incident Response & SOC teams for orgs seeking ongoing protection.

OUTCOMES YOU CAN EXPECT

- Visibility into stealthy or historic security breaches
- Confidence in the integrity of your IT environment
- Data-driven validation for leadership, compliance, and insurers
- Practical recommendations to close gaps and reduce future exposure
- Strengthened foundation for ongoing security operations

EMPOWERING CONFIDENCE

Our engagement provides actionable, validated outputs that equip both technical teams and leadership with clear visibility, prioritized findings, and the guidance needed to strengthen your organization's security posture with some of the following deliverables:

- ✅ Validated Threat Findings & Technical Report
- ✅ Executive Summary & Leadership Briefing
- ✅ Prioritized Remediation Recommendations

WHY IT MATTERS

A clean environment isn't something you assume, It's something you verify. We help you close the visibility gap with expert analysis, credible findings, and a clear path forward, so your leadership can act decisively and protect what matters most.
